This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE Library of Marietta College contains upward of 9,000 volumes. It had its origin in the donation of a few volumes in the infancy of the institution, and at one time consisted mostly of text-books, the gift in part, of the students of Amherst and Yale. The first considerable addition by purchase, was a choice collection of philological works, selected in Europe in 1837, by President, then Professor, Smith. With this accession the Library numbered 3,000 volumes, and soon after the first Catalogue, prepared by Tutor Adkins, was published. In 1852 President Smith again visited Europe and procured the larger and more valuable part of the present Library, embracing many rare and costly works. In the departments of Natural Science, in Philology, Metaphysics, Theology and Biblical Literature, probably no College Library at the West is so well supplied; while any deficiency in works of general literature is met by the well selected and rapidly increasing Libraries of the Literary Societies. From the $10,000 subscribed before the recent purchases, there remains an income to the Library of over $300 a year, which is further increased by students' fees. It is to be hoped, however, that this is but the beginning of Marietta College Library. A Library edifice is much needed for the security, better arrangement and growth of the several libraries connected with the College, which already make an aggregate of over 15,000 volumes.

The present Catalogue does not pretend to complete accuracy, having been hastily prepared during odd intervals of leisure, and some difficulties having attended the composition and proof-reading. The

most competent critics will regard mistakes with most indulgence, as knowing the wide discrepancies of the best bibliographical manuals and the great labor of preparing a work even of this size. The general arrangement is by authors, while to aid students in referring to particular subjects, an Index, partly alphabetical and partly analytical, which has been somewhat compressed from its original design, has been appended. Titles of works which were not in during registration, were taken from the Librarian's manuscript catalogue, and are hence sometimes defective and perhaps incorrect. In the capital letters of the Alphabetical Catalogue and in the Index, type could not be procured to express the French accents and German umlauts; for the sake of uniformity and to preserve the true alphabetical arrangement, the latter were not in such cases written as dipthongs. Notwithstanding these and any other imperfections which may occur, it is hoped the Catalogue will develop to a greater extent than heretofore the resources of the Library and facilitate its use with all who may enjoy its privileges.
